Puzzle of the Month

$$\text{fish} + \text{bean} + \text{fish} = \text{skewer}$$

$$26 - \text{skewer} = \text{watermelon}$$

$$\text{watermelon} + \text{watermelon} = 2$$

$$\text{fish} + \text{fish} = \text{watermelon} + 9$$

$$\text{skewer} - \text{bean} = ?$$

Exam Tips for Year 12 students

by Selvi Wensor

Here are a few lines of advice for those who are preparing for the Year 12 examinations at the end of this month.

Some of you may have sat mock exams and found out what your areas of weakness are. Go back to those areas to revise and do some similar questions to make sure you have understood the area well.

Ask yourself whether you are using your technology efficiently to save time in your exams. If not, make sure you learn how to use your technology efficiently.

Make it a point to note down the avoidable errors that you have made in the past and make sure to pay closer attention to these in your next practice.

Summary notes in the form of a bound book can be taken into some of the examinations, but not into others. Do you know that you can take your Textbook into those exams which allow a bound reference?

Have you noted down what formulas are given in the formula sheet? Some content that are heavily tested are not in the formula sheet and you are expected understand and remember them to be able to do the questions in your notes-free examination for Maths Methods and Specialist Maths.
