Puzzle of the Month

Curriculum information for VCE Maths Students by Selvi Wensor

Victorian Curriculum and Assessment Authority (VCAA) publishes comprehensive information on Study design, School-based Assessment and Examination specifications. The current study design has been extended until December 2022.

If you are studying Unit 3 and 4 in any of Further Mathematics, Mathematical Methods or Specialist Mathematics, you will have School-assessed Coursework (SAC) which counts for 34% of your overall mark in the subject.

VCAA makes a series of 5 short videos (maximum 10 minutes per video) for Unit 3 and 4 to help teachers prepare assessment material. If you do have the time, please watch the videos as they will inform you of what you could be assessed on.

Please read your study design carefully and mark off the areas completed as you progress through the course. There are also powerpoint presentations on mark specifications and the type of questions that could be asked. These give you a clue as to what is expected in the answer.

Referral Bonus

Receive a \$10 credit on your next invoice for every referral you make that leads to at least 1 booked lesson.
