## Puzzle of the Month

### Can You Solve This?

Use your math skills to find the value of each icon and the '?'

$$21 = \text{pirate} + \text{pirate} + \text{ship}$$

$$\text{anchor} + \text{map} + \text{anchor} = 13$$

$$6 = \text{map} + \text{map}$$

$$\text{anchor} + \text{ship} = 9$$

$$14 = \text{pirate} + \text{ship}$$

$$\text{ship} + \text{pirate} + \text{map} + \text{ship} = ?$$

# Doing well in maths when moving from primary to secondary school

## by Selvi Wensor

When transitioning to secondary school, students need to adapt and change how they learn and apply themselves in order to thrive in many subjects, including maths.

One of the main changes is that subjects are taught by different teachers at different times and in different rooms during the week. To thrive in secondary school, students need to be organised, self sufficient, discover how they learn best and be prepared to ask for help when necessary to name a few skills.

In secondary school, students need to take the necessary equipment and materials into their lessons, as opposed to finding all they need in one room. They also need to use a homework diary and keep it updated as homework will arise from different subjects. Writing clear notes and asking questions about what you are learning will help with preparing for tests and exams. Setting their own goals to improve on their tests, assignments and exams will all help with confidence and self sufficiency.
