## Puzzle of the Month

$$\text{fish} + \text{bean} + \text{fish} = \text{skewer}$$

$$26 - \text{skewer} = \text{watermelon slice}$$

$$\text{watermelon slice} + \text{watermelon slice} = 2$$

$$\text{fish} + \text{fish} = \text{watermelon slice} + 9$$

$$\text{skewer} - \text{bean} = ?$$

# What's new in the 2023 VCE Maths Syllabus?

## by Selvi Wensor

- The 2023 VCE Mathematics courses for units 1 to 4 can be found on the VCAA website. I have watched the implementation webinar for the Mathematical Methods course for units 1 to 4 and hope to watch the video for General Maths (units 1 to 4) and Specialist Maths (units 1 – 4) in the next few weeks.
- From watching the video for Maths Methods, I gathered that the new introduced content includes concepts of pseudocode and algorithmic thinking. There are also changes to the topic of area under the curve and how it will be taught, which are part of calculus content. There are slight changes to the weighting of internal and external assessment.
- The General Mathematics (old Further Mathematics) does not seem to have geometry and measurement or graphs and relations. I will keep you updated about the other two courses in the next newsletter.
