24 Ways to Avoid Making Careless Mistakes during Math Exams

by Mr Au

In an earlier newsletter, I have written about the types of mistakes that students make in exams and tests. I have had students ask me “how do we avoid careless errors”.

I have come across a blog post from another tutor who addresses this issue and puts forward a number of excellent solutions.

Please take a few minutes to read the blog post from Mr Au. You can see that his solutions can be divided into these major categories (Please copy the below address into your Web browser).
